LeetCode

CodeChef

Education

Indian Institute of Information Technology Dharwad

B.Tech in Computer Science and Engineering

2024 – Present

CGPA: 8.00

Technical Skills

Programming Languages: Java, Python, JavaScript

Frontend Technologies: HTML, CSS, TailwindCSS, React.js, Next.js

Backend Technologies: Node.js, Express.js

Databases: MongoDB

Tools and Platforms: Git, GitHub, Cloudinary, Multer, Redux Toolkit, WebSockets

Core Concepts: Data Structures and Algorithms, Linux, System and Usable Security, Basics of Time Series Forecasting

Projects

Backend File Upload System

GitHub

- Designed and developed a scalable backend service using **Node.js**, **Express.js**, and **MongoDB** for efficient media upload and management.
- Implemented secure file handling using **Multer middleware** to process user uploads.
- Integrated **Cloudinary** for cloud-based media storage and optimized image delivery.
- Built RESTful APIs enabling smooth communication between client and server applications.

Social Media Web Application

GitHub

- Developed a full-stack social media platform allowing users to create, update, and interact with posts.
- Built dynamic and reusable UI components using **React.js**.
- Integrated backend APIs for persistent storage of user-generated content using **MongoDB**.
- Implemented efficient state updates and component-based architecture for scalable UI development.

Startup Website (Mlera UI)

GitHub

- Contributed to the frontend development of a startup website using **Next.js**.
- Designed responsive UI components ensuring compatibility across multiple devices and screen sizes.
- Focused on clean UI structure and modern frontend development practices.

Todo Application

GitHub

- Developed a task management application allowing users to add, update, and delete tasks.
- Implemented interactive UI features and efficient state updates using modern JavaScript.
- Designed a clean and minimal interface for improved usability and productivity.

Problem Solving

- Solved **330+** **Data Structures and Algorithms** problems on **LeetCode**.
- Achieved a **1500+** **rating on LeetCode** and earned **4 platform badges**.
- Achieved a **1200+** **rating on CodeChef**.
- Regularly practice competitive programming and algorithmic problem solving.

Achievements

- Selected at the college level for the **Smart India Hackathon**.
- Pitched a startup idea called **AgriIndus** focused on connecting farmers directly with industries; the idea was shortlisted during evaluation.
- Secured **4th place in a college hackathon** consisting of three rounds including domain-based MCQs (Blockchain, Arduino, Web Development, Competitive Programming), a competitive programming round, and a final online treasure hunt challenge.
- Secured **3rd position in an inter-college meet**.
